How can Active Learners enhance delivery of education in your school?

We ensure your pupils receive the highest standard of education. We guarantee all pupils we teach have excellent engaging lessons which will enable them to enhance their skills, develop a passion for learning as well as helping pupils become intelligent performers, both in and out of the classroom.

What essentials of PPA and curriculum does Active Learners deliver?

Our qualified teachers and specialists, teach all expanses of the National Curriculum. Our trained team have a solid understanding of 'outstanding' teaching of EYFS, KS1 and KS2.. All of our specialist subject lessons and term topics are pre-organised for the school year, so all of our teachers know what they will be teaching prior to each term, with all lessons meeting the national curriculum requirements.

How will Active Learners impact your school?

We will support your school and produce an encouraging philosophy of high quality education, guaranteeing all pupils have a impacting experience as well as extra curricular clubs whilst inspiring pupils to seek a healthy and active lifestyle. We will provide a massive lifestyle change for children who are not so open with peers, and who are quite introverted in interacting with others.

How do we give schools the resources they need?

Schools are operating in a challenging financial environment, and cannot be expected to do more with less. The Government must recognise schools as playing a key role in promoting good health and wellbeing with resource them accordingly.

Schools must be part of an integrated system for tackling children's SEN needs, particularly in relation to early identification, intervention and prevention. Schools need to be involved in local transformation processes, as the associated funding provides an opportunity to fund interventions in schools that can reduce the demand on CAMHS and the economic costs of long-term mental health problems.

They must also receive appropriate support to deliver a whole-school approach to wellbeing and resilience through the curriculum, school culture and beyond.

97%

Of Active Learners teachers stay in our employment for more than 2 years on average.

98%

Of our partnered schools said they were very happy with our services.....

100%

Devotion to serving our schools and inspiring communities.

"LIFE CHANGING SUBJECT SPECIALISTS"

www.activelearnerseducation.co.uk

Partner with us today so your school can:

Save Money

Save Time

Have
Consistency

We aim to deliver the curriculum to the highest impact possible because the problem with majority of schools is that:

- A) There is a lack of finances and resources
- B) Schools often have to cut staff in order to save money

So we cover that cost by partnering with Primary and Secondary Schools delivering their PPA, providing essential mental health specialists, extended clubs, and holiday provisions. When we do this, we pay the school a rental fee, so that the school get paid for us being there. So whilst we charge schools between school hours, we'll pay you back for what we do in the extended school clubs, as well as offering parents a costs effective solution to child care.

By partnering with Active Learners your school will be able to implement a complete solution to educating pupils in the right way, with life-long effective education, including assessing their current knowledge, implementing tailored learning pathways based on each pupil's ability, and concluding in a final assessment that enables you to demonstrate evidence of pupil progress to Ofsted.
